

PURPOSE / PROJECT / EXPEDITION PLAN

TITLE OF PROJECT / PURPOSE: STUDY OF MAP TO GROUND APPRECIATION

BRIEF OUTLINE OF THE PUPOSE / PROJECT:

Using maps, photographs and notes of different natural and manmade prominent features we see on all out hikes we will be making a PowerPoint presentation so our leaders other Cubs and Scouts can use it to help understand how map symbols really compare and actually look like on the ground. This will be done by showing slides of the symbols, photographs of the features and the parts of the map where the feature was. Hopefully it will help them in the future to visualise what the map is really trying to show them.
